To:

ALAN S. CAJES, PhD

Senior Executive Fellow and SPARTA Project Lead

Development Academy of the Philippines

Respected Sir,

This is in reference to a Peer-graded assignment that I failed in the "SP101 - Getting Grounded on Analytics" course in the Data Scientist Track offered in the SPARTA Scholarship. As several peers have pointed out, I seem to have failed to give weight to my answer to the questions by conducting a more generalized approach rather than specific and targeted answers. With this, I am humbly asking for your reconsideration in giving me another chance to provide my insights and apply the learnings I procured from the concerned part of the course.

Also attached is a screenshot of the failing assignment for your review.

Hoping for your kind consideration,

Earl Joshua P. Ragotero
